Habitat for Humanity

Adam Hartman joined the MJ team in 2019 as a consultant in the Risk Management + Commercial Insurance department. In his role, Adam focuses on providing exceptional customer service, communication, and attention to small businesses in order to offer the best risk management strategies. Adam enjoys working closely with clients, meeting with them face-to-face, learning about their companies, and building meaningful relationships. He also specializes in proactive risk management practices, working towards aligning the company's goals and initiating their risk management programs.

Adam has a history with MJ, having interned with the organization twice during his time at DePauw University. During his internships, he worked on client renewals and risk transfers. Prior to his time at MJ, Adam interned with two other insurance brokerages, where he worked in sales and business development and as an international assistant coordinator. Adam's enthusiastic energy and determination to provide creative solutions to complicated and nuanced challenges make him an invaluable member of the MJ team.

Outside of MJ, Adam can be found living a healthy lifestyle, attending sporting events, participating in home renovations or spending time with friends and family.
