FAVORITE QUOTE

"Nobody can make you feel inferior without your permission."
- Eleanor Roosevelt

Becky Seiler joined the MJ team in 2002 as a claims coordinator in the Commercial Claims department. She was later promoted to a risk transfer specialist in the Risk Management + Commercial Insurance department. Over time, Becky transitioned to the role of a client executive, where she works closely with the analytics, risk services, and client advocacy teams to develop and implement risk management strategies that safeguard our clients' interests and position them for long-term success.

With over three decades of experience on the agency and carrier side of the business, Becky brings a unique and knowledgeable perspective to our organization. Her dedication to providing clients with the best solutions for their insurance needs makes Becky a true asset to the MJ team.

Becky spends the majority of her free time with her husband and twins, Kate and Max. If she could spend her whole life on the lake, she would. Becky would absolutely love to take her son to South Africa one day to watch the great white sharks "fly," just off the coast. In addition to her twins, Becky has a dog named Roxy and a tortoise named Hoagie. Turtles hold special significance for Becky, which is why she keeps turtle figurines on her desk at all times.
