FAVORITE QUOTE

“There’s never enough time to do
all the nothing you want.” - Calvin
and Hobbes

Rahul Jha joined the MJ team as an analyst in our Enterprise Data department. Rahul plays a key role in developing innovative solutions to navigate complex and evolving data, helping turn ambiguity into clear, actionable insights. He also contributes to the extrapolation and validation of data, generating reports that highlight key trends and patterns to inform and drive strategic business decisions for our clients.

Prior to joining MJ, Rahul gained experience working as a product business analyst in the healthcare AI space, building dashboards to evaluate insights, performing technical support, and leading data acquisition efforts. He effectively leverages his expertise to continuously build out and improve features in our proprietary analytics platform, APERTURE®, thereby facilitating easy and quick access to accurate and comprehensive information for MJ and our clients.

In his free time, you may find Rahul hitting some dinks on the pickleball court or making electronic music! As a competitive table tennis player, he enjoys any sport that features a racket. He loves spending time with his pets, and hopes one day to visit every Grand Slam.
