Obama

Denae Sorrell joined the MJ team as an associate client executive in our Benefits Consulting department. In her role, Denae collaborates with MJ clients to inform benefit strategy development and support plan management and execution. She works cross functionally with wellness, analytics, compliance, communications, pharmacy, and client advocacy teams to implement client healthcare and benefit strategies and deliver a seamless coordinated client experience.

Before joining MJ, Denae worked as an in-house benefits analyst at some of the largest companies in the nation and worked with prominent brokerages where she supported clients in achieving their strategic goals while also managing day-to-day projects and providing ongoing support. Denae is extremely passionate and dedicated to producing excellent results for our clients.

Outside of work, Denae enjoys staying active where she participates in pilates, yoga, traveling, and walking her dog, Fletcher. She is also a major Taylor Swift fan and whenever Taylor Swift is playing in a stadium nearby, Denae is likely to be there.
